

The reality of assisted dying in Canada

Assisted suicide and euthanasia (MAiD) have been legal since 2016. Most legislatures see numbers rise slowly.

Canada has seen the fastest growth in assisted dying of any legislature

Assisted deaths have risen nearly 10-fold in 6 years¹
 Increased 32% in the 1 yr¹
 Account for 3.3% of all deaths (4.8% in BC)¹

Canada: number of AD deaths

Canada is 22nd in end-of-life care rankings (down 11 places since 2015)^{2, 3}

85% of Canadians do not have access to publicly funded palliative care and many areas have none.^{5, 6}
 40% of AD patients had no PC involvement before death.⁷

Less than half of assisted deaths have seen a specialist palliative care team⁴

Canada no longer requires a patient to be terminally ill⁸
 Currently debating to allow those with mental illness, learning disability and autism to be included⁹

Official data is sketchy with no information on adherence to eligibility or safeguards¹⁰
